

WE BELIEVE THAT **RIDING A BIKE** IS ABOUT
BEING FASTER!

FASTER THAN WALKING,
FASTER THAN CARS STUCK IN A TRAFFIC JAM,
FASTER THAN YOUR TRAINING PARTNER,
FASTER THAN YOU WERE BEFORE!

JUST FEEL YOUR **HEART BEATING FASTER....**

BEFASTER

MTB FULL-SUSPENSION

YOU ROCK, BABY

In **Superior** we only develop ideas that we fully fall for. It's not our mission, it's our character: we don't want to be average, we aim to be superior! Thanks to close cooperation with world-class riders and their mechanics from **Superior XC Team** the designing process of our bikes is supported by their invaluable feedback. **Superior full-suspension mountain bikes** are **fast** and **super light** racing machines. Designed to flow over **rough terrain**, to **save** your priceless **energy** while going uphill and to let you **rest** during downhill. When every second count, the rear suspension improves **traction**, while precise steering allows you to follow the line you chose. Highly **optimized components** together with progressive geometry comprise a **perfect cross country bike** with hardly any need for upgrades. Apart from 100-mm travel XC race bikes and marathon winner you can choose a purely hedonistic 130-mm trail bike! And this is only because we don't want you to be average. **Dare to be superior!**

WHY?

We belong to the tribe that hold their breaths waiting for the sound of a starting gun. We uuuhhh and ouch watching World Cup courses: **rock gardens, boulders, drops, rooty uphill, muddy slopes and supersonic passages...** natural or artificial, fast and scary. Cross country mountain biking is getting faster and harder! It is not enough to be just skilled; it's about being extremely versatile and proving the mastery in every single aspect that may count.

At Superior we cheer every rider, from kids and dark horses to masters and elite. We always have this ‚hurrah‘ feeling when we see them go over the obstacles, sigh with relief after narrowly escaped crashes and we never ever say: We would do it better! because we wouldn't! The only thing we can improve - bikes! And this is what we decided **to focus on!**

Racing means speed, therefore we never doubted what our ultimate goal should be! Being fast, however consists of tiny elements that need to be fit together. We wanted to **go as far as possible and equip our bikes with the best solutions available.** This is why we re-thought the geometry, re-designed the frame and suspension. The final product? A bike that is **fully prepared for current XC courses** and the growing demands of the riders.

We also knew we wanted to bring new light to our portfolio and that is why **Superior XC Team** became a part of our crew. **They are born fighters** and have the experience we need...With their help we can make the riders even faster.

WHO WILL RIDE IT?

For those who live from **race to race**. For those who wake up early in the morning when the fog is thick and the rain is just about to start.

For those who ride against all odds, when common sense tells to stay home, but common sense knows nothing about **passion for cycling**.

For those who **set goals for each competition**, who want to challenge another uphill, another technical downhill, another timed lap.

For those who promised their **friends to support them**, to reach out for victory for their club.
For those who cannot let other people down, who will do their very **best to reach their goals**.

It's for **leaders, achievers
fighters, team players** and
restless warriors.

Linda Indergand

Superior XC Team, Women Elite Rider

**After her race at MTB World Cup
in Nove Město na Morave (6th place)**

„Bike was really flying up the hill because it's light and I enjoyed every single downhill and corner because it's more stable and safer over the rocks and roots. The fork and the stamp were working really well and I chose this bike because I felt good on it since the first pedal stroke. That the result was so good, makes it even better.“

Fabian Haug

Superior XC Team Manager and Mechanic

„For me, coming from gravity related biking, the new frame is a huge step forward for more downhill capability and fun in the technical descents. I like the longer reach and slacker design as well as the really low top tube, which gives more freedom to move the bike through rough terrain actively. Together the stiffness of the frame, the central riding position and the incredible light-weight structure make the new Superior XF 29 a real rocket on and off the racetrack.“

Jan Vastl

Superior XC Team, Men Elite Rider

„The biggest advantage for me is the new geometry. The new head tube angle and longer top tube help me in the technical sections, make me more confident and faster in the downhills! The frame is lighter, stiffer and with better handling. The perfect bike for the new modern XCO tracks.“

IT'S ALL ABOUT THE **WEIGHT!**

We love carbon fibre. It's durable, resilient, mouldable, easily manipulated to balance stiffness and flexibility and most of all... it is lightweight! Our frames are made of CRB Pro High-Modulus - special carbon fibres, which help to lower the weight of the frame by 10%, and still gaining the raise of its lateral stiffness. The technology itself requires experience and skill. The production processes are meticulously controlled, which include influencing fabrication methods and final quality. It all allowed us to create a 1717-gramm full suspension cross country frame that we believe will make you rule the race courses.

BECAUSE
WE
BELIEVE
IN
QUALITY

NEW KINEMATIC SYSTEM

The goal was to create a system that offers sensitive characteristics at the beginning of the travel, the perfect support from the sag point onwards, plus an optimised end progression. For the rider this means: smooth damping during fast passages, a balance between stiffness and suspension response during dynamic climbing and safety in steep sections.

Our XF Team bikes are the weapons of choice for many top-level riders. XF979 RC uses the same frame and features as our top XF TEAM models, just for this model we choose the balance of the best possible components for wider riders group. XF979 RC bike is not only for World Cup riders but for anyone who wants to be fast on a bike. You can be an athlete, skier, football player or climber, XF979 RC is the perfect MTB bike to your fast cross country riding.

MTB HARDTAIL

WE WANT TO SEE YOU WINNING

Superior hardtail mountain bikes emerged from two priorities: **lightness and simplicity**. No frills! Just a frame and fork, two wheels and gears. Ready to cooperate with your legs and body and instantly respond to your commands. **Stiff** and **easy to handle** it is **ready to go** wherever you wish to get. Prepared to **win** only if you are ready yourself. Challenge it and challenge yourself - **go outside** and **be faster** than the day before! Push it to its limits, climb and jump over the obstacles. Once you try it, you'll love roots and rocks, and it will easily carry you up and down, from dawn to dusk. The **purest mountain biking** idea dressed in the most **reliable components**. Nothing to add. Just go and win!

MODO

MEN ARE ALSO ALLOWED

Superior Modo is a complete collection of bikes designed especially **for women**. With a hint of **girly colours**, unrivalled **quality**, and **high-end components** the collection offers top-notch **racing vehicles** as well as good looking and comfortable everyday bikes designed for women. In Superior we believe that real power comes from the ambitions and things we enterprise, we know that pink is only a colour and a good bike means a good bike, whoever uses it. So, with a bit of fashion and accessories suited to women's anatomy **Modo** collection respond to woman cyclists' demands, but still representing the same quality and durability as men's models. It's time for celebration. It's time for a joyride!

5-YEAR FRAME WARRANTY

A warranty only applies to manufacturing defects of the frame and the way it was constructed and does not apply to the finish / coating of the frame and its accessories.

Making a claim against the warranty is subject to the condition that the frame is regularly inspected by an authorized SUPERIOR service station, and that the check is performed at least once per the calendar year. The date on which the bicycle was purchased is considered to be the first day of the warranty period. The regular service inspections must be confirmed with an entry in the chart in the Warranty Card (the penultimate page in the User Manual). The warranty is only valid if you have this document showing regular inspections. The costs relating to the service inspections are covered by the customer alone.

The date of the purchase counts as the opening date for the warranty period.

WE OFFER A 5-YEAR FREE WARRANTY ON SUPERIOR FRAMES FROM 2020 COLLECTION.

ROAD & GRAVEL

A full-page background image showing two cyclists in red and black jerseys riding their road bikes on a grassy hillside. The background is a lush green valley with a winding road and distant mountains under a cloudy sky.

ROAD IS ONLY THE BEGINNING

Immersed in the old tradition of gran fondo, in sweat, dust and suffering **Superior Road and Gravel** bikes yet escape the world of road heroes and instead of this offer uncompromised comfort with its Gran Fondo models and freedom inaccessible before thanks to disc brakes and off-road tires in Gravel bikes.

Your love for **long distances** has never got a better chance before and your craze for exploration has finally found its fulfilment! We know that road cycling is about **speed, smoothness and striving for perfection**, so we rarely decide on compromises. We combined our most comfortable frame ever with light and reliable wheels to make sure you can do your best during a long distance ride. We want you to chose the road which you want, to ride as far as you only wish and to stop if there is something worth stopping. Your comfort and satisfaction is our priority. All materials, components and accessories we use are the highest quality possible, to allow you to enjoy your ride. Whoever you are: a racer, an explorer or a wild traveller - you'll find your faithful companion. Whichever road you choose, keep your pace, enjoy the surroundings, and let your bike carry you!

WHY?

X-Road model line represents the philosophy of road cycling in a more extended and universal way. We imagined you riding long distances on tarmac roads without being tired and happily maintaining the desired travelling speed. We also saw you go off the beaten track and enjoy the roughness of the gravel paths and wilderness in any weather conditions. We also knew that our bike had to be extremely good looking!

From the very beginning, our aim was to build a bike that is versatile. It is good enough to fulfil the needs of an everyday user and at the same time stiff and sporty to be the choice of brevet and gran fondo lovers. We focused on the design of the frame to make it the stiffest and the most comfortable possible. We wanted to be able to change the character of the bike only by manipulating the components.

THE DESIGN AND GEOMETRY

X-Road is simple! We hide cables inside and put auxiliary inner tubes to make the service precise and easy. This together with hidden seatpost clamp, gives the bike stealthy look.

New X-Road has **very short chainstays**, a solution that makes the bike **agile, fast and playful** in the light terrain. It has also the **head tube taller** to provide a more upright position and to enhance comfort during long rides.

CARBON FIBRE

This widely used composite material is still one of the most creativity inspiring. Not only does it let achieve great stiffness and rigidity but also support unconventional frame shapes. In crucial points of X-Road frames, we used special shock absorbing structures which work as micro suspension (Micro Suspension Technology).

MICRO SUSPENSION

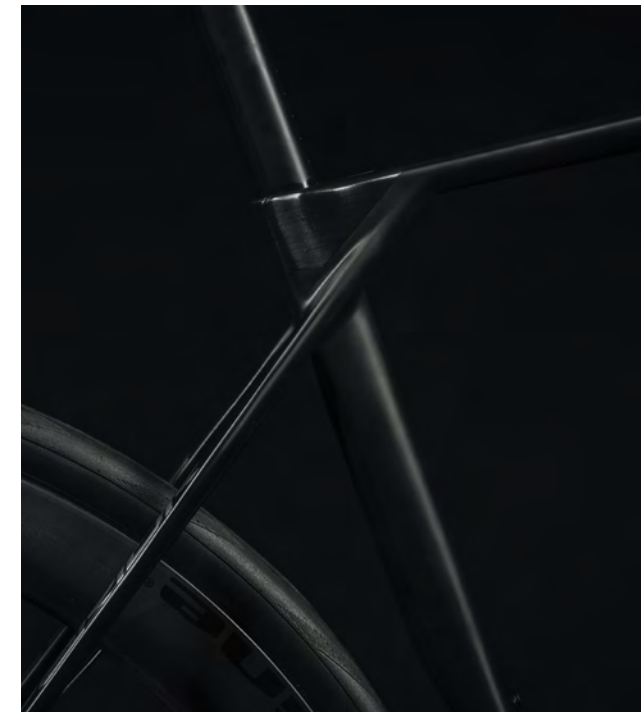

The fork more resistant to loads from braking powers is now stiffer and equipped with **"micro suspension"** which absorbs micro shocks and protect your wrists. The special shock-absorbing weave of carbon fibres was **also used in the seat stays and top tube.**

12-millimetre axle ensures stiffness of the wheel-fork structure giving you confidence while taking turns, especially at high speed.

Thanks to disc brakes, the clearance allows for tires as wide as **40 millimetres.**

SAME FRAME, DIFFERENT SPECS

In both models, we used the best components to make you perfectly satisfied. The narrow seatpost provides additional comfort and tire width depending on the purpose may vary from 28 in **Gran Fondo** bikes to 40 millimetres with enhanced grip in **gravel bikes.**

SPECIAL FEATURES

INTERNAL CABLE ROUTING

Integrated cockpit with cables hidden in the handlebars (the highest models) and frame internal cable routing is responsible for X Road clean and sexy look.

FLAT MOUNT DISC BRAKES

Flat Mount disc brakes reduce the bike weight, enhance aerodynamics and refine the look.

MUDGUARD READY MOUNT

To make sure it is possible, we wanted a solution which will give you the natural feel of riding a normal MTB with every pedal stroke you take. This is possible thanks to an intuitive power supply by Shimano STEPS and its three-mode system.

JUNIOR

READY TO BE A CHAMPION

Raising a **little champion** is usually the parents' dream. Even if the success is not so easy reachable, it is impossible without children's **passion**. Let your children love the bikes they ride! Their weaker but agile bodies deserve machines suited to their forces. **Superior Junior** collection is lightweight, equipped with **components designed especially for children**, which let them feel the bike and handle it with ease. We do not want children to ride on bikes heavier than our own. We cared for the necessary and got rid of the heavy extras. Racing geometry and carefully chosen accessories and components such as smaller brake levers and derailleur shifters as well as short cranks aim to make Junior bikes the lightest possible. With **27.5", 24" or 20"** wheels it is possible to choose the right size and make the little champions happier with their tiny successes. **Let them discover happiness!**

SUPERIOR JUNIOR BIKES

Children deserve bikes they will love because bikes are best memory makers! And making friends becomes so easy while on a bike! At Superior we believe that love for bikes starts early and lasts long. Superior Junior collection is an invitation to the world of cycling passion and never ending fun! As all riders are children inside!

LOW WEIGHT

It is important as children's bodies are weaker. The lighter bike is, the less tired children are during trips, and the more confident they feel on a bike. The weight is also the key factor during first races and training sessions. Little champions appreciate a light and playful bike which gives them a chance to excel. Apart from that, all children know what fun is to brake and accelerate faster than your friends! With a light bike it's easy!

DRIVE SUITED FOR TINY BODIES

Shorter cranks mean more efficient pedalling and more space between pedals and the ground. This let natural spin and helps children feel safe on a bike. Like in adult race bikes we got rid of unnecessary chainrings and left 1x. It's lighter, less confusing for little beginners and perfectly enough to fulfill their needs.

RESIZED BRAKE LEVERS

To ensure suitable braking power Junior bikes have resized brake levers which fit children's fingers. It enhances safety and boosts children's confidence as it helps them control their bikes in a natural way.

KID-FRIENDLY PARTS

All Junior bikes are equipped with saddles and grips conveniently fitted to children's anatomy. This make them feel comfortable on their bikes no matter if they have only started riding their bike or have rich cycling experience.

**Superior accessories for those who care and for those who don't.
Durable, solid, superbly designed by bikers - just for a biker like you!**

ONE1 accessories are compatible with all Superior bikes and let customize their look and usage. They are designed to complement your bike configuration, are easy to use and mount. We want you to enjoy your bike, have fun during your rides and feel safe and cared!

ONE1 offers you bike parts and accessories which are thoroughly thought by the crew who have had more than 20-year experience in bike making. We don't know your riding style but we know what is important to feel good on a bike.

ONE1 satisfies the needs of all types of riders: racers, commuters, everyday riders, travellers and adventurers, offering the right choices instead of compromises.

CLOTHES

Protection, comfort, function and look

Superior clothes are visible - equipped with reflective elements to make you seen on the road, they also look good so no-one goes past you uninterested. They protect you from the weather conditions and give you comfort you need to stay on a bike as long as you want to. Designed by bikers for bikers. They are stylish and made of high quality functional materials and equipped with all the premium extras, which you overlook at the first sight, like waterproof pockets, zipped pockets for valuables, YKK zippers, silicone bands to keep cuffs and rear in place.

1.

2.

3.

4.

5.

1. MTB-XC JERSEY SHORT SLEEVE

Made of premium fabrics, equipped with reflective logos at each side, MTB crosscountry jerseys have flattering cut, which feels good while on and off the bike. Lightweight and breathable, with YKK zipper, three rear pockets and additional waterproof zipped pocket to keep your valuables safe, Superior jersey is a great choice for your rides.

3. TRAIL JERSEY SHORT SLEEVE

Made of lightweight and flexible fabric, it features reflective logos and a rear pocket. Casual and loose fit will make you feel great while riding your bike and after it while relaxing with friends.

5. BIB SHORTS BOTTOM LINER

The bottom layer designed specially to fit loose Race pants. They have additional cargo space at the rear and at sides. Made of lightweight and breathable fabrics, they provide comfort and hygienic feel. Designed to stay in place inside Race pants thanks to additional pullers.

2. RACE PANTS LOOSE

Designed to withstand dust and mud and crashes, Superior race pants are made of light and durable fabrics. Equipped with YKK zipper and side pockets to allow to get inside liner cargo pants. Designed to fit LINER cargo pants, they are adjustable at the waist with Velcro strap and represent loose casual trail fit to make you feel relaxed during your rides and after them.

4. MTB BIB SHORTS

Combine luxurious fabrics and premium seamless fit with reflective elements, XC pro bib shorts will give you unrivalled comfort and performance. Designed for racing, they will be a great companion during long distance rides.

HELMETS

Because you have one brain!

For any type of a cyclist a helmet is the most important element of protection equipment. Superior helmets combine style and high level of protection and ventilation. You can choose from 8 types of Superior helmets: from kid helmets, through junior, durable MTB helmets with extension at the back, to stylish urban and XC racing light helmets. All of them fulfill high safety standards and look exactly the way they should - stylish and protective.

1. TRAIL PRO

Helmet is designed for all-mountain riders that demand the balance of style, protection and ventilation. Internal air channels are combined with open intake and exhaust ports to maximize ventilation. Under visor channels promote airflow to prevent fogging of your eyewear.

3. MTB RACE

Helmet meets racers' needs without any compromises, provides all the features you want in a lightweight and stylish package. Easy fit adjusting system works for a secure and comfortable fit.

5. MTB FUN

It is an everyday helmet with 19 vents that keep your head cool. Comfortable fitting retention systems and lightweight construction makes it ready for any adventure.

7. F.L.Y

Junior helmet delivers fit, function, safety and style. It offers the latest in head protection technology, an easy to adjust fit system, and 13 vents for breathability. Ready for anything the trail throws to your way.

2. TRAIL

It is a full coverage helmet ideal for all-mountain riders who demand superior protection in hard conditions. Hard shell feature protection in impact areas giving riders the confidence they need to charge harder.

4. MTB SPORT

Head protection for mountain bikers looking for a stylish and great fitting helmet. The helmet features extended coverage at the back of the head for additional protection, internal air channels and 24 vents to keep riders cool. Easy fit adjusting system works for a secure and comfortable fit.

6. CROSSRIDE

It is the e-bike helmet for a clean, modern look and urban-friendly cruising. Compatible with R.Light 50 for extra safety during night trips.

8. RACER

A helmet designed to keep up with today's young chargers. It helps kids enjoy their first rides well equipped with rear coverage and durable construction. And because style matters - the helmet comes in cool bright colours.

1. BAGS

Bicycle bags are essential for storage of basic bicycle equipment and valuables. In ONE1 bicycle bags you can carry multitool, tube, tyre repair kit, levers, phone, keys, wallet, credit card or cash.

2. LIGHTS

Extremely important part of equipment in low light conditions. In any circumstances: during an all-night ride or a way back home in the evening, ONE lights are easily mounted and last long providing safety and visibility.

3. CYCLE COMPUTERS

ONE1 cycle computers measure your daily performance and distance travelled. Intuitive and easy to operate they are good helpers for every trip.

4. PUMPS

ONE1 offers large service pumps as well as minipumps. Whichever you choose they are essential tools that should not be missing in any bicycle workshop and a jersey pocket. Every ONE pump fits any kind of bicycle valves, they are durable and effective.

5. MULTITOOLS

The absolute 'must have' for every rider. A large selection of different keys can help eliminate most of the problems encountered, such as tightening a loose screw, flat tyre, and even a torn chain.
